Seat Depth

3

Measure user's back to back of knee:

Fill in measurement:
(Ideal chair depth)

Information

Need extra pressure relief? See **page 7** for additional seat options.

3

Select which seat will best suit the user:

	Length / Aperture Design	Bridged Seat Bridged front design removes the risk of the users' leg falling into the gap of the seat – so consider this one for thinner users. Ideal for users with involuntary movement or those performing a side transfer.		Open Front Seat The open front seat gives the user and carer more access for personal hygiene. Opt for this seat when access is required and there is no risk of legs becoming entrapped in the gap.
